- SQL course at Besant Technologies
- Web Designing (HTML5, CSS, JavaScript & Bootstrap)
- Basic Computer Application – "A" Grade

Projects

Project Link (GitHub)

Python - https://github.com/Deepideepi/Deepi-Project.git

Covid Data Management System

Developed a system in VS Code to manage patient records. Patient details are added, stored, and displayed through a MySQL database. The project focuses on organizing information and making data retrieval simple and clear

ATM Machine

Created a basic ATM simulation in VS Code where user deposit and withdrawal details are collected and stored in a MySQL database. The system handles user inputs and updates the stored records based on the transactions

Hotel Management System

Designed a booking system in VS Code that automatically stores passenger details in a MySQL database. The project manages booking entries and keeps the information organized for easy access

Training Institute Database System

SQL - https://github.com/Deepideepi/SQL-PROJECT-1.git

This project represents a database system designed for a training institute. It includes four main parts: Instructors, Courses, Students, and Enrolments. The system helps manage information in an organized way, making it easy to store and access details for each area

Login and Registration Web Page

HTML, CSS - https://github.com/Deepideepi/HTML-Project1.git

This project is a simple web page created using HTML and CSS. It includes clean and responsive forms for user login and registration. The design focuses on providing a neat layout and a smooth experience for users

Service-Based Business Website

Web Page Project - https://github.com/Deepideepi/HTML-CSS-Project1.git

I completed a real website project using HTML and CSS as part of my frontend learning journey. Through this project, I improved my understanding of page structure, layouts, styling, and responsive design. The project focuses on a service-based business website and represents a professional layout for a painting and interior services business. It showcases the services offered, work stages, and recent project highlights

Focus Areas: layout design, styling, content structure, and UI clarity

Personality traits

- Willing to Learn
- Adaptable to New Challenges
- Team - Oriented

Personal Information

Name	:	DEEPIKA V
